TEAM

Builders and operators. *AI and Services.*

SIDDHANT DANG

CRESCENDO

Crescendo: Led vertical AI applications at the frontline of CX services and transformation (0 → \$B+ platform in 2-yrs)

BCG

BCG: Drove large-scale operating transformation and digitization programs

GENERAL CATALYST

Accel and General Catalyst: Investments & portfolio support across AI & software

Wharton
UNIVERSITY of PENNSYLVANIA

Wharton (UPenn): Finance, strategy, and capital allocation; US AI & tech networks

BITS Pilani

BITS Pilani: Engineering foundation
BITSAA 30 Under 30: Global Business Leader

PARIKSHIT JOON

SigIQ.ai

SigIQ: Building frontier agentic AI, architecting multimodal LLM systems and the production patterns that ship

Prismforce

Prismforce: Scaled the AI platform serving 25% of India's IT services industry (10K → 600K+ users)

Microsoft

Microsoft Teams & Copilot: Shipped SkillPrism, an agentic AI assistant for 300k enterprise users (one of the first 10 apps published on Copilot)

amazon

Amazon Pay: Built core merchant experiences (Scan & Pay); integrated with SAP/Oracle ERP and POS integrations at India's largest enterprises

BITS Pilani

BITS Pilani: Engineering foundation

EXECUTIVE SUMMARY

From diagnostic to deployed AI

THESIS

Partner with SFS to design and deploy AI across value chain – from a CEO decision cockpit to vernacular farmer-facing agents – through a unified platform of AI Copilots, Autopilots, and Console that operates them.

DIAGNOSTIC

Project Leap surfaced 215 use cases across 12 solutions; 12 hero priorities for Wave 1 (0–12 months) – spanning farmer engagement, channel-partner workflows, manufacturing, R&D, and an enterprise CEO cockpit. SFS sits at digital maturity of 2.1/5 today (integration 1.4, analytics 1.0); foundation needs to be built in parallel with use cases.

APPROACH

Conformal embeds with SFS teams to build, ship, and operate use cases – Three layers of AI tech (Copilots, Autopilots, Conformal Console) delivered through a Diagnose & Design → Build & Run → Drive & Expand lifecycle, with forward-deployed engineering on the ground.

OUTCOME

Decision velocity for executives. Productivity uplift for field, channel partner, and farmer-facing teams. Vernacular engagement at scale. Margin and working capital gains across procurement, manufacturing, and finance – quantified by Bain at INR 50–80 Cr topline (field force) and INR 10–15 Cr savings (procurement) within 2 years.

TEAM

Builder leadership combining enterprise AI scale (Amazon, Crescendo), large-scale operating transformation (BCG), and India SME capital experience (Accel). BITS Pilani · Wharton.

LEARNINGS

Data foundation gates every function

AI POWERED INSIGHTS AND ANALYTICS

Use case: Natural language based analysis, insights, and dashboarding capabilities

Key gate: Data foundation

SALES & MKTG.

Use case: Sales enablement, customer engagement

Key gates: Data backbone, change mgmt. & adoption

PROCUREMENT

Use case: Vendor & contract intelligence

Key gates: Data foundation

R&D

Use case: NPD, Rapid experimentation/simulations

Key gates: Structured knowledge base

MFG.

Use case: Real-time mfg. Intelligence

Key gates: Hardware, SAP adoption, data foundation

LOGISTICS & WAREHOUSING

Use case: End-to-end visibility

Key gates: Data systems

SUPPORT FUNCTIONS

Use case: Digital workflows

Key gates: Data systems

DATA SYSTEMS + DATA STORES

Foundation gates everything. SFS today: Integration 1.4/5, analytics 1.0/5 (Bain DMA)

Wave 1 must address data plumbing in parallel – agents are only as good as the data they query

One platform. Three AI Products: Copilots, Autopilots, and Conformal Console

CONFORMAL AI COPILOTS

USER FACING AI THAT AUGMENTS JUDGEMENT IN REAL-TIME

Decision Authority: Human stays in the driver's seat; AI accelerates the work

Best for: Knowledge work and field judgement – CEO Cockpit, TBM Voice Assistant, R&D, Variance Analysis

Surface: Chat, voice, UI panels embedded in existing and new apps

CONFORMAL AI AUTOPILOTS

AGENTIC WORKFLOW THAT RUNS END-TO-END WITHOUT HUMAN-IN-THE-LOOP

Decision Authority: Agent decides and acts; Humans review exceptions

Best for: Bulk reconciliations, farmer campaigns, channel & field sales workflows, freight, exception monitoring

Surface: API and system integrations; runs in the background

CONFORMAL CONSOLE

Performance · Cost · Accuracy · Drift · Escalations · Approvals · Access controls · Usage & ROI by use case

Built and delivered by Conformal forward-deployed engineering teams

USE CASES

The full opportunity: 215 AI use cases, 12 solutions

AI POWERED INSIGHTS AND ANALYTICS

Enterprise (CEO Chatbot) · 1 cross-functional decision cockpit · Wave 1A priority

SALES & MKTG. 84 use cases

Sales and distribution/ channel enablement

Automated farmer engagement

PROCUREMENT ~20 use cases

Vendor assessment

Contract intelligence

Enablement (negotiation prep)

LOGISTICS & WAREHOUSING ~20 use cases

End-to-end workflow tracking

Real-time tracking and monitoring

MANUFACTURING 15 use cases

End-to-end workflow tracking

Real-time tracking and monitoring

R&D 31 use cases

Rapid prototyping, and experimentation

AI-first simulations

SUPPORT FUNCTIONS 44 use cases

Self-service model

Workflow digitization

Automated analysis and insights

DATA SYSTEMS + DATA STORES

SAP · Salesforce · Growth Book · ByteEdge · Mandi & weather feeds · IoT · Soil data · ...

LEGEND

WAVE 1A PRIORITY

REQUIRES FURTHER DIAGNOSIS

Conformal

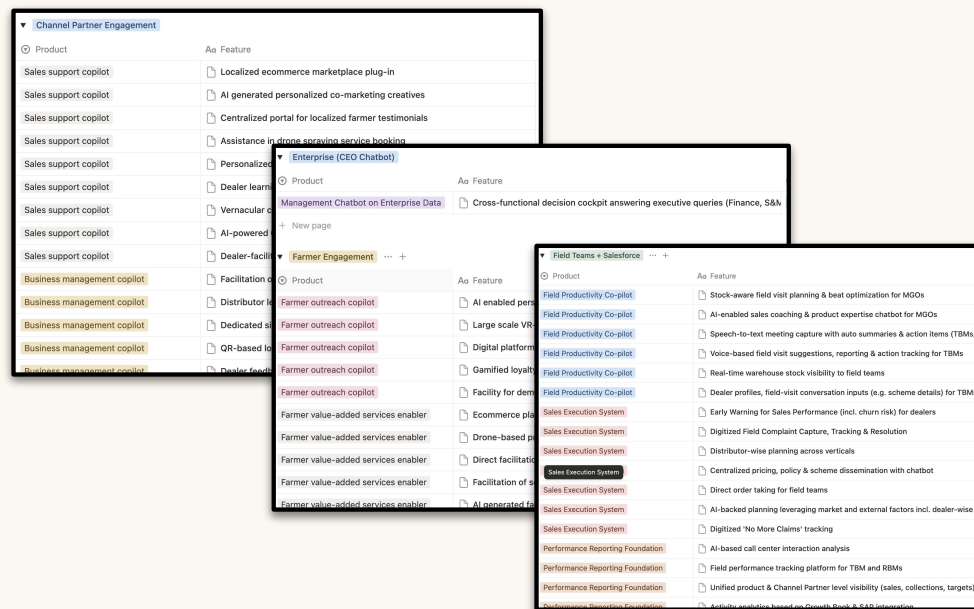

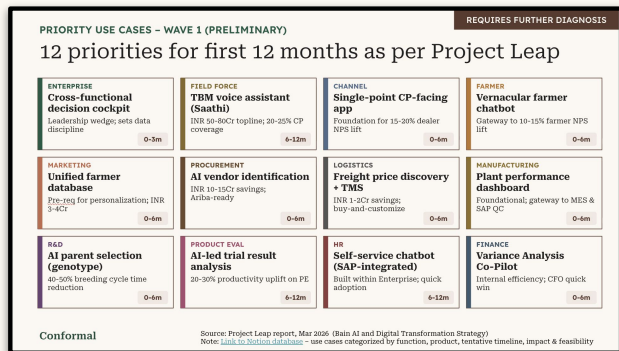

Source: Project Leap report, Mar 2026 (Bain AI and Digital Transformation Strategy)

Note: [Link to Notion database](#) – use cases categorized by function, product, tentative timeline, impact & feasibility

Product-wise build approach ensures coverage and one-shot, robust fixes

Project Leap prioritizes use cases based on impact and feasibility, however does not factor in execution realities

We recommend a function-by-function, product-first execution and dev approach

DEMO – ENTERPRISE COCKPIT (CEO CHATBOT)

Ask a question. The whole enterprise answers.

The screenshot displays the 'Project Leap' Executive Cockpit interface. On the left, a sidebar contains a 'Chat' button, 'Saved Reports', and a list of 'CONVERSATIONS' including 'Field force Q3', 'Procurement', and 'Farmer NPS'. The main area is titled 'Executive Cockpit / Shriram Farm Solutions' and features a 'LEADERSHIP KNOWLEDGE BASE' section. This section includes a heading 'Leadership questions, *ready*' and a subtext: 'Fire the business probes first, then use the trust probes as follow-ups to show source, assumptions, chart rationale, and limits.' Below this is a 'KNOWLEDGE BASE READY' status bar and a note: 'Source trails, assumptions, chart rationale, and limits are locked.' A search bar prompts 'Or ask your own question...' with an 'Ask' button. The 'SUGGESTED CARDS' section at the bottom displays eight cards with various business metrics and questions, such as 'How is FY26 closing? Where are we vs plan?', 'Why did Q2 FY26 EBITDA miss budget?', and 'Where are we vs plan by BU and region, and which area is causing the FY26 gap?'.

FEATURE HIGHLIGHTS

Cross-functional context

Unified knowledge base across Sales, Mfg, Procurement, Finance, R&D, ...

Natural language queries

Ask in English or Hindi; structured answers with sources and chain of thought tracking

Real-time signal aggregation

Performance, anomaly, and exception alerts surfaced proactively

Drill-down to source

From summary → underlying transaction or system of record

Voice + text input

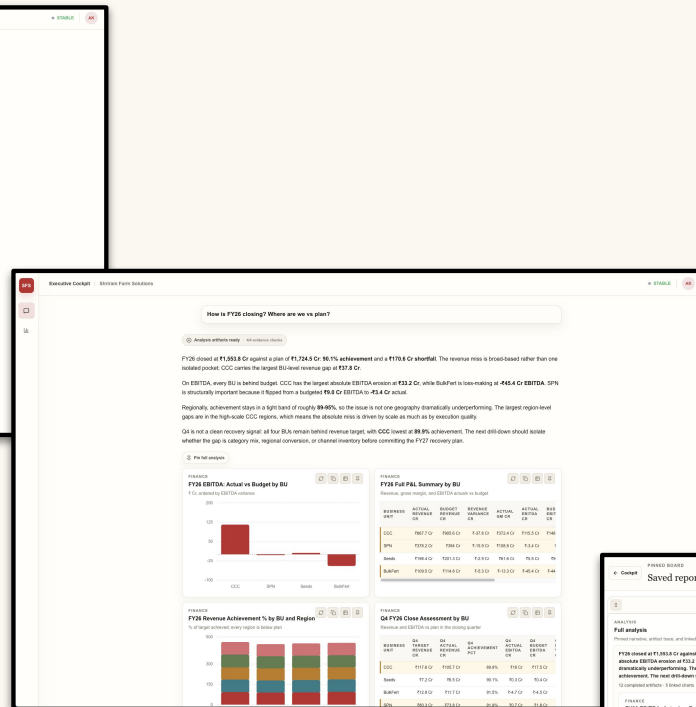

Optimized for executive on-the-go usage

Enterprise integration

SAP · Salesforce · Growth Book · data warehouse

Audit trail & access controls

Role-based permissions; full query log retained

TRANSFORMATION APPROACH

Diagnose. Build. Drive. Embedded with you.

PHASE 1

DIAGNOSE & DESIGN

DURATION

4–8 weeks

Frame the opportunity, prioritize, architect the solution.

KEY ACTIVITIES

- Use case prioritization workshop
- Data audit & integration scoping
- Solution architecture & roadmap
- Wave 1 sprint plan

DELIVERABLE

Transformation execution roadmap + Wave 1 SOW

PHASE 2

BUILD & RUN

DURATION

12–24 weeks per Wave

Embed with SFS teams. Ship working software, not documents and slides.

KEY ACTIVITIES

- Forward-deployed engineering
- Agile builds in 2-week sprints
- User co-design with SFS teams
- Pilot → production handoff

DELIVERABLE

Live use cases with measured early impact + ROI study plan

PHASE 3

DRIVE ADOPTION & EXPAND

DURATION

Ongoing

Operate, evolve, and expand the platform.

KEY ACTIVITIES

- Change management & training
- 24×7 operations & SLAs
- Knowledge transfer to SFS IT
- Wave 2 / Wave 3 expansion

DELIVERABLE

Value realization. Sustained ops + roadmap to next wave

NEXT STEPS

Eight weeks from alignment to first builds

- 1** **Week 0-1**
Workshop alignment – follow-up meeting
Confirm scope, stakeholders, and data access. Sign mutual NDA and align on Wave 1 success criteria.
- 2** **Week 2-3**
Diagnostic workshops
Joint working session with SFS leadership across functions. Validate Project Leap priorities; surface dependencies.
- 3** **Week 4**
Wave 1 prioritization
Ranked use case list with business case (impact, feasibility, sequencing). Joint sign-off on top 5-6 to scope first.
- 4** **Week 5-6**
Pilot scoping & SOW
Detailed scope, architecture, and success metrics for first 2 use cases. Commercial construct + delivery plan.
- 5** **Week 8**
Pilot kickoff
Begin Build & Run for first wave. Forward-deployed team embeds with SFS counterparts. First demos in 4 weeks.

Conformal

Creating Change.
Without Distortion.

EXECUTIVE SUMMARY

From diagnostic to deployed AI

THESIS

Partner with SFS to design and deploy AI across value chain – from a CEO decision cockpit to vernacular farmer-facing agents – through a unified platform of AI Copilots, Autopilots, and Console that operates them.

DIAGNOSTIC

Project Leap surfaced 215 use cases across 12 solutions; 12 hero priorities for Wave 1 (0–12 months) – spanning farmer engagement, channel-partner workflows, manufacturing, R&D, and an enterprise CEO cockpit. SFS sits at digital maturity of 2.1/5 today (integration 1.4, analytics 1.0); foundation needs to be built in parallel with use cases.

APPROACH

Conformal embeds with SFS teams to build, ship, and operate use cases – Three layers of AI tech (Copilots, Autopilots, Conformal Console) delivered through a Diagnose & Design → Build & Run → Drive & Expand lifecycle, with forward-deployed engineering on the ground.

OUTCOME

Decision velocity for executives. Productivity uplift for field, channel partner, and farmer-facing teams. Vernacular engagement at scale. Margin and working capital gains across procurement, manufacturing, and finance – quantified by Bain at INR 50–80 Cr topline (field force) and INR 10–15 Cr savings (procurement) within 2 years.

TEAM

Builder leadership combining enterprise AI scale (Amazon, Crescendo), large-scale operating transformation (BCG), and India SME capital experience (Accel). BITS Pilani · Wharton.

LEARNINGS

Data foundation gates every function

AI POWERED INSIGHTS AND ANALYTICS

Natural language powered analysis – from trends to detailed line-level drill-downs
Generate leadership buy-in; Create data discipline for faster execution of downstream use cases

SALES & MKTG.

Adoption is the bottleneck
Internal users (TBMs) ship in months; channel partners and farmers in years
(50-60% adoption per Growth Book / ByteEdge benchmark)
Sequence Wave 1 around internal users

PROCUREMENT

Mix of build and buy
Ariba covers transactional flows
AI layer (vendor scoring, negotiation prep, should-cost) is where the moat is built

R&D

Productivity gains land early
NPD impact takes 2-3 years given research cycles
Knowledge management and trial copilots ship in months
Generative trait design is multi-year

MFG.

Hardware-gated
Sensor installation precedes software value
Plant performance dashboards and SAP QC adoption are natural Wave 1 entries
Deeper MES is multi-quarter

LOGISTICS & WAREHOUSING

Buy & customize TMS solutions (Freight Tiger, Project44, Fynd)
deliver 90% of value out-of-box
Don't build what you can configure
SFS-specific analytics on top

SUPPORT FUNCTIONS

Buy full suite for HR / Finance core (Darwinbox, Vena, Zoho)
Build only the AI intent layer that connects to enterprise data – that lives inside the Enterprise solution

DATA SYSTEMS + DATA STORES

Foundation gates everything. SFS today: Integration 1.4/5, analytics 1.0/5 (Bain DMA)
Wave 1 must address data plumbing in parallel – agents are only as good as the data they query

One platform. Three AI Products: Copilots, Autopilots, and Conformal Console

CONFORMAL AI COPILOTS

USER FACING AI THAT AUGMENTS JUDGEMENT IN REAL-TIME

Decision Authority: Human stays in the driver's seat; AI accelerates the work

Best for: Knowledge work and field judgement – CEO Cockpit, TBM Voice Assistant, R&D, Variance Analysis

Surface: Chat, voice, UI panels embedded in existing and new apps

CONFORMAL AI AUTOPILOTS

AGENTIC WORKFLOW THAT RUNS END-TO-END WITHOUT HUMAN-IN-THE-LOOP

Decision Authority: Agent decides and acts; Humans review exceptions

Best for: Bulk reconciliations, farmer campaigns, channel & field sales workflows, freight, exception monitoring

Surface: API and system integrations; runs in the background

CONFORMAL CONSOLE

Performance · Cost · Accuracy · Drift · Escalations · Approvals · Access controls · Usage & ROI by use case

Built and delivered by Conformal forward-deployed engineering teams

USE CASES

The full opportunity: 215 AI use cases, 12 solutions

AI POWERED INSIGHTS AND ANALYTICS

Enterprise (CEO Chatbot) · 1 cross-functional decision cockpit · Wave 1A priority

SALES & MKTG.

84 use cases

Vernacular farmer chatbot
TBM voice assistant (Saathi)
CP single-point app
Unified farmer database
AI sales coaching for MGOs

PROCUREMENT

~20 use cases

AI vendor identification
Vendor credit check
Real-time import data analysis
Should-cost modelling
Negotiation prep agent

LOGISTICS & WAREHOUSING

~20 use cases

Freight price discovery
Optimal route reco
Real-time consignment monitoring
Ocean freight tracking
E-Proof of Delivery

MANUFACTURING

15 use cases

Plant performance dashboard
Energy & RM cost optimization
Digital QM (LIMS-led)
SAP QC adoption
Sensor-backed MES

R&D

31 use cases

AI parent selection (genotype)
Lab & project management
AI trial design agent
Trial result analysis
Generative trait design

SUPPORT FUNCTIONS

44 use cases

Self-service HR chatbot
Knowledge platform
Variance Analysis
Co-Pilot
Customized FP&A reporting
Vendor onboarding automation

DATA SYSTEMS + DATA STORES

SAP · Salesforce · Growth Book · ByteEdge · Mandi & weather feeds · IoT · Soil data · ...

Note: [Link to Notion database](#) – use cases categorized by function, product, tentative timeline, impact & feasibility

PRIORITY USE CASES – WAVE 1 (PRELIMINARY)

12 priorities for first 12 months as per Project Leap

ENTERPRISE**Cross-functional decision cockpit**

Leadership wedge; sets data discipline

0-3m

FIELD FORCE**TBM voice assistant (Saathi)**

INR 50-80Cr topline; 20-25% CP coverage

6-12m

CHANNEL**Single-point CP-facing app**

Foundation for 15-20% dealer NPS lift

0-6m

FARMER**Vernacular farmer chatbot**

Gateway to 10-15% farmer NPS lift

0-6m

MARKETING**Unified farmer database**

Pre-req for personalization; INR 3-4Cr

0-6m

PROCUREMENT**AI vendor identification**

INR 10-15Cr savings; Ariba-ready

0-6m

LOGISTICS**Freight price discovery + TMS**

INR 1-2Cr savings; buy-and-customize

0-6m

MANUFACTURING**Plant performance dashboard**

Foundational; gateway to MES & SAP QC

0-6m

R&D**AI parent selection (genotype)**

40-50% breeding cycle time reduction

0-6m

PRODUCT EVAL**AI-led trial result analysis**

20-30% productivity uplift on PE

6-12m

HR**Self-service chatbot (SAP-integrated)**

Built within Enterprise; quick adoption

6-12m

FINANCE**Variance Analysis Co-Pilot**

Internal efficiency; CFO quick win

0-6m

DEMO – ENTERPRISE COCKPIT (CEO CHATBOT)

Ask a question. The whole enterprise answers.

The screenshot displays the 'Project Leap' Executive Cockpit interface for 'Shriram Farm Solutions'. The top navigation bar includes a 'STABLE' indicator and a user profile 'AK'. The main content area is titled 'LEADERSHIP KNOWLEDGE BASE' and features a large heading 'Leadership questions, *ready*'. Below this, a message states: 'Fire the business probes first, then use the trust probes as follow-ups to show source, assumptions, chart rationale, and limits.' A progress bar labeled 'KNOWLEDGE BASE READY' is shown, followed by the text 'Source trails, assumptions, chart rationale, and limits are locked.' A search bar prompts 'Or ask your own question...' with an 'Ask' button. The 'CONVERSATIONS' sidebar on the left lists 'Field force Q3' (2 mins ago), 'Procurement' (Yesterday), and 'Farmer NPS' (Mon). The 'SUGGESTED CARDS' section at the bottom displays eight interactive cards with various business metrics and questions, such as 'How is FY26 closing? Where are we vs plan?', 'Why did Q2 FY26 EBITDA miss budget?', and 'Where are we vs plan by BU and region, and which area is causing the FY26 gap?'.
